

WATER MAIN FLUSHING

OCWA will be flushing portions of the water distribution system in the town of Onondaga beginning June 22, 2009. You may temporarily experience low pressure when we are flushing in your neighborhood. Should you experience discoloration, run the cold-water tap for 10-15 minutes until water clears.

Please visit our website at www.ocwa.org for more information on our Flushing Program.

If you have any questions please call OCWA at 455-7061 ext. 3106 or 3125. Thank you.
